

## Spare parts produce for rotary dryer and rotary conditioner

CHAENG is well known to manufacture steel casting parts for rotary kiln: tyre, support roller, girth gear, pinion gear, thrust roller, etc. Many customers consult us: Does CHAENG produce spare parts for rotary dryer and rotary conditioner? Of course!

CHAENG is professional in manufacturing support roller, girth gear, rolling ring and other large parts for rotary kiln and rotary steam conditioner according to customers' drawings and demands.

### Advantages of CHAENG steel castings:

1. Before casting, numerically simulate the casting process by CAE software to analyze the molding process, predict and optimize the product quality.
2. CHAENG uses advanced detection equipment for non-destructive testing to ensure the internal quality of steel castings, strictly stop any defective goods from leaving the factory. CHAENG steel castings can meet level-two flaw detection standards.

3. CHAENG has strong technical teams, detailed production scheduling, wide range of raw materials purchase channels, and perfect logistics delivery system, making efforts to achieve as fast delivery period as required.

4. The 24h fast response and the customer services in all 365 days rest your heart when you make choice, ease your heart when you use the products, satisfy your heart when you enjoy the services.
