

Rolling mill housing, rolling mill parts manufacturer, CHAENG has significant advantages

The rolling mill is a device that realizes the metal rolling process. Its working environment is harsh, the main components are susceptible to corrosion and wear, and the technical and quality requirements of the components are high. CHAENG (Great Wall Steel Casting) focuses on the production of large-scale steel castings for more than 10 years, and can cast and process high-quality rolling mill accessories for customers according to customers' drawings and needs.
