

Jaw crusher accessories - Jaw plate (moving plate, fixed plate)

Commonly used name: jaw plate (movable plate, fixed plate), dental plate, toothed plate, high manganese steel jaw plate, ultra high manganese steel jaw plate, composite alloy jaw plate, wear-resistant jaw plate

Main materials: high manganese steel (Mn13, Mn18), manganese chromium alloy (Mn13Cr2, Mn18Cr2), hard alloy, etc.

Casting process: sand mould process

Applicable materials: river pebble, granite, basalt, iron ore, limestone, quartzite, diabase, iron ore, gold ore, copper ore, etc.

Application: sand and gravel yard, mining, coal mining, concrete mixing station, dry mortar, power plant desulfurization, quartz sand, etc.

CHAENG supplies crusher jaw plate:

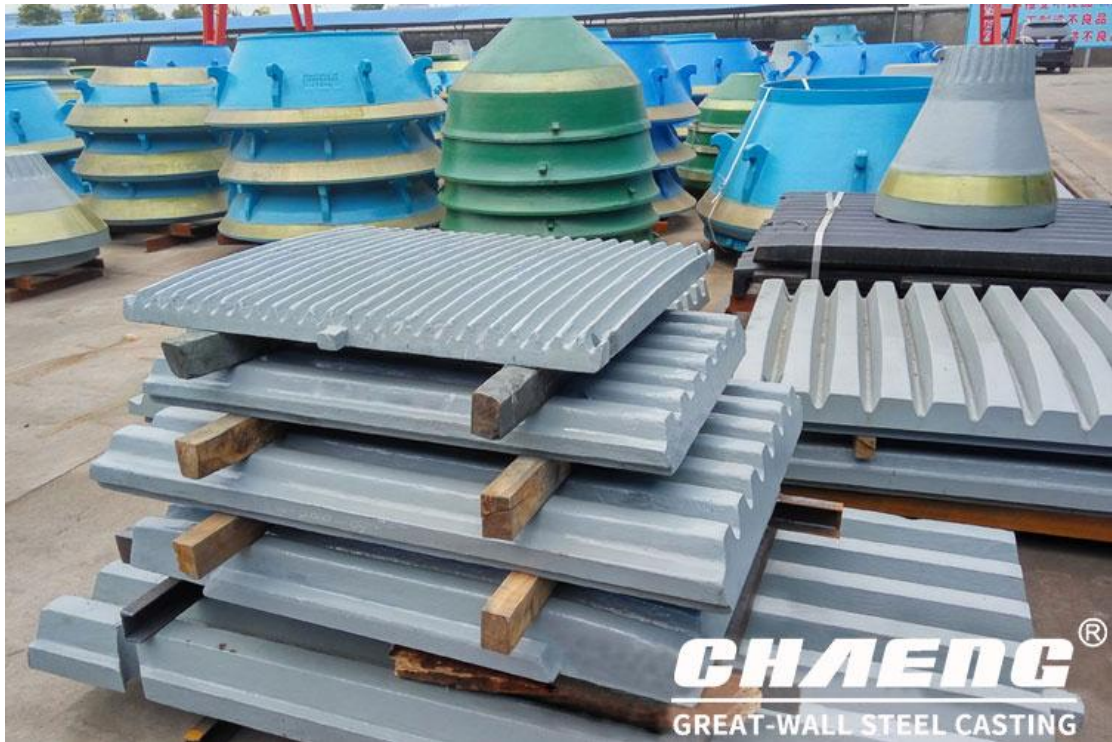

Weight: 3-30T

Application industry: Mining, cement, chemical and other industries

Main material: ZG270-500

Can it be customized: Yes

Performance advantages:

1. High quality

Each link in the production of crusher jaw plates has been controlled. Before leaving the factory, it must be strictly inspected by the quality inspection department to ensure the quality of each jaw crusher jaw crusher.

2.High cost performance

CHAENG crusher jaw plate is made up of high-strength high-quality steel, and processed by unique heat treatment technology, which optimizes the structure and the hardness of jaw, so that the performance of crusher jaw is enhanced greatly to ensure the stability of jaw plate under long operating time, and guarantee its long service life.

3.Longer life

After scientific and strict smelting, casting and heat treatment, it has a high degree of wear resistance and its service life is greatly improved.
